February 7, 2011

Dear Consultant:

The Missouri Highways and Transportation Commission is requesting the services of a consulting engineering firm to perform the described professional services for the project included on the attached list.

If your firm would like to be considered for these consulting services, you may express your interest by responding to the appropriate office, which is indicated on the attachments. Limit your letter of interest to no more than five pages. This letter should include a statement to indicate why your firm is interested in the project. It should also include any other information which might help us in the selection process, such as the persons or team you would assign to each project, and the backgrounds of those individuals. Please include in your submittal summaries of projects your company has completed that improved public or industrial wastewater treatment facilities (including lagoon systems) and drinking water facilities. Of particular interest are projects in which the consultant modified existing facilities to correct environmental violations. References are required for all projects cited. We will utilize the consultant information already on file so we will not need a lengthy submittal of other general company information.

DBE firms must be certified by the Missouri Department of Transportation in order to be counted as participation towards an established DBE Goal. We encourage DBE firms to submit letters of interest as prime consultants for any projects they feel can be managed by their firm.

We request all letters be received by 3:00 pm, February 24, 2011 at the appropriate office.

Sincerely,

Dave Nichols
Director of Program Delivery
