

December 8, 2010

The following constructability and informational meeting has been scheduled for a project in the April 22, 2011 bid opening:

<u>County</u>	<u>Route</u>	<u>Job No.</u>	<u>Date & Time</u>	<u>Location</u>
Jackson	I-670	J4I2023B	December 13, 2010 1:00 p.m.	MoDOT Kansas City District Office 600 NE Colbern Road Lee's Summit, MO 64086 Room 255

The scope of this project is to replace the existing Broadway Street Bridge (Bridge No. A1117) over Route I-670 in downtown Kansas City. The existing 5 span continuous concrete box girder bridge has a total length of about 366 feet. (see attached plan sheet) The project site is constrained by the intersections at both ends of the bridge since these must remain open to traffic during construction. Roadway construction will be limited to the minimum improvements necessary to connect to the existing roads. Construction of the project must be completed and all lanes open to traffic prior to September 16, 2011. This is the opening date of the new Performing Arts Center.

The project has a very short timeline for plan development and project completion. We are in the early stages of project design. Therefore, preliminary plans are not currently available for Job No. J4I2023B. If you are unfamiliar with the project area, a visit to the project site prior to the meeting will greatly enhance your understanding of the project constraints. Early input from the contracting industry will greatly aid us in developing a project that can effectively meet all of the parameters for a successful project.

Currently the only known project milestones are: April 22, 2011 – Project Letting
 April 2011 – Project Award/Notice to Proceed
 Project Complete Prior to September 16, 2011

Project contact: Jeff Hardy (816) 607-2266

Attendance is not required, but your comments and input will be greatly appreciated.
