Section 34.355, RsMO, requires the vendor or contractor to certify his compliance with Section 34.353 and, if applicable, Section 34.359, RsMO, at the time of bidding **and** prior to payment. **Failure to complete and return this document with this bid will cause the State to presume the manufactured goods or products listed in the bid are not manufactured or produced in the United States, and the bid will be evaluated on that basis. Please read the certification appearing below on this form.**

If all the goods or products specified in the attached bid which the bidder proposes to supply to the State shall be manufactured or produced in the "United States" as defined in Section 34.350, RsMO, check the box at left.

The bidder's failure to complete and return this document with the bid as directed above will cause the State to presume the manufactured goods or products listed in the bid are not manufactured or produced in the United States, and the bid will be evaluated on that basis pursuant to Section 34.353.3(2), RsMO.

The sides of the ring shall be crimped so that bristles are firmly held into position during use. The sides of the ring that form the shoulders (or channel) that contains the attachment end of the bristle filament shall be a minimum of  $\frac{3}{4}$ " tall and a minimum of 0.534" wide from outside edge to outside edge. The inside diameter of the retaining ring shall be 10" to  $10\frac{1}{8}$ ". The retaining ring shall have the standard drive lug protruding into the inside diameter of the metal retaining ring. The drive lug can be either a rectangular lug or steel pin lug. The rectangular lug shall be 20 gauge steel formed into a rectangle to produce a 1" long by  $\frac{1}{2}$ " tall drive lug that is welded onto the inside diameter of the retaining ring. **2.3.1.3** The bristle filament shall have a specific gravity of 0.90, softening point of 240° F, water absorption  $\leq 0.03\%$ , completely resistant to mildew and chemically inert to oil, grease, acids and other common chemicals.

**3.0 SAMPLING.** At the discretion of the engineer two wafers will be selected at random of each size and type ordered and tested for compliance with this specification.

### **4.0 ACCEPTANCE.**

**4.1** The supplier shall furnish to the engineer a manufacturer's certification for each shipment

showing specific test results complying with the material and quality requirements of these specifications for each type of wafer being furnished.

**4.2** Acceptance of the wafers will be based on a satisfactory manufacturer's certification and tests deemed necessary by the engineer.

**4.3** If any of the requirements and/or specifications are not met, all wafers covered by the purchase order will be subject to rejection.
