**Plant Mix Oil Material
Addendum 001**

Request No. SW-13-025AM

Question (4): In past years, different locations required the contractor to provide anti-strip in the mix. Is that required?

Response: Contractor is responsible to design a pre-mix that performs according to this contract

Question (5): If you consider a 9% mix design and another considered 5%, do you adjust the mix quantities??

Response: Pre-mix will be bid as total tons of pre-mix (including aggregate and Asphaltic Cement). Please see updated bid sheets with this addendum.

Question (6): Is the rock at Eldorado Springs or Fair Play been tested?

Response: Both locations have provided pre-mix in previous years

Question (7): If you do a plant pickup, when does the 14 day period begin?

Response: 14 days after total mix is stockpiled at plant

Question (8): Will other quarry locations be considered for Items #2 (Bolivar) and Item #13 (Eldorado Springs)

Response: Both MoDOT locations have issues with space or environmental issues. These reasons limit MoDOT from being able to stockpile on these maintenance lots, thus the reason for not accepting the delivered option.

MoDOT will accept bids for the supply and stockpiling of material on alternate locations. MoDOT will award as specified in Section 13.8. Material cost and haul distance may be used as determining factors. Contractor to provide locations of material sources and stockpile locations on attached form.

In addition, for material awarded from the Plant Pickup option, MoDOT will pay awarded contractor for 90% of material produced after meeting contract specifications and additional 10% as material is picked up by MoDOT.
