

**CHAPTER II
PRELIMINARY DESIGN**

Below are guidelines that should be followed when preparing public hearing location sketches as exhibits for Commission location and/or design approval:

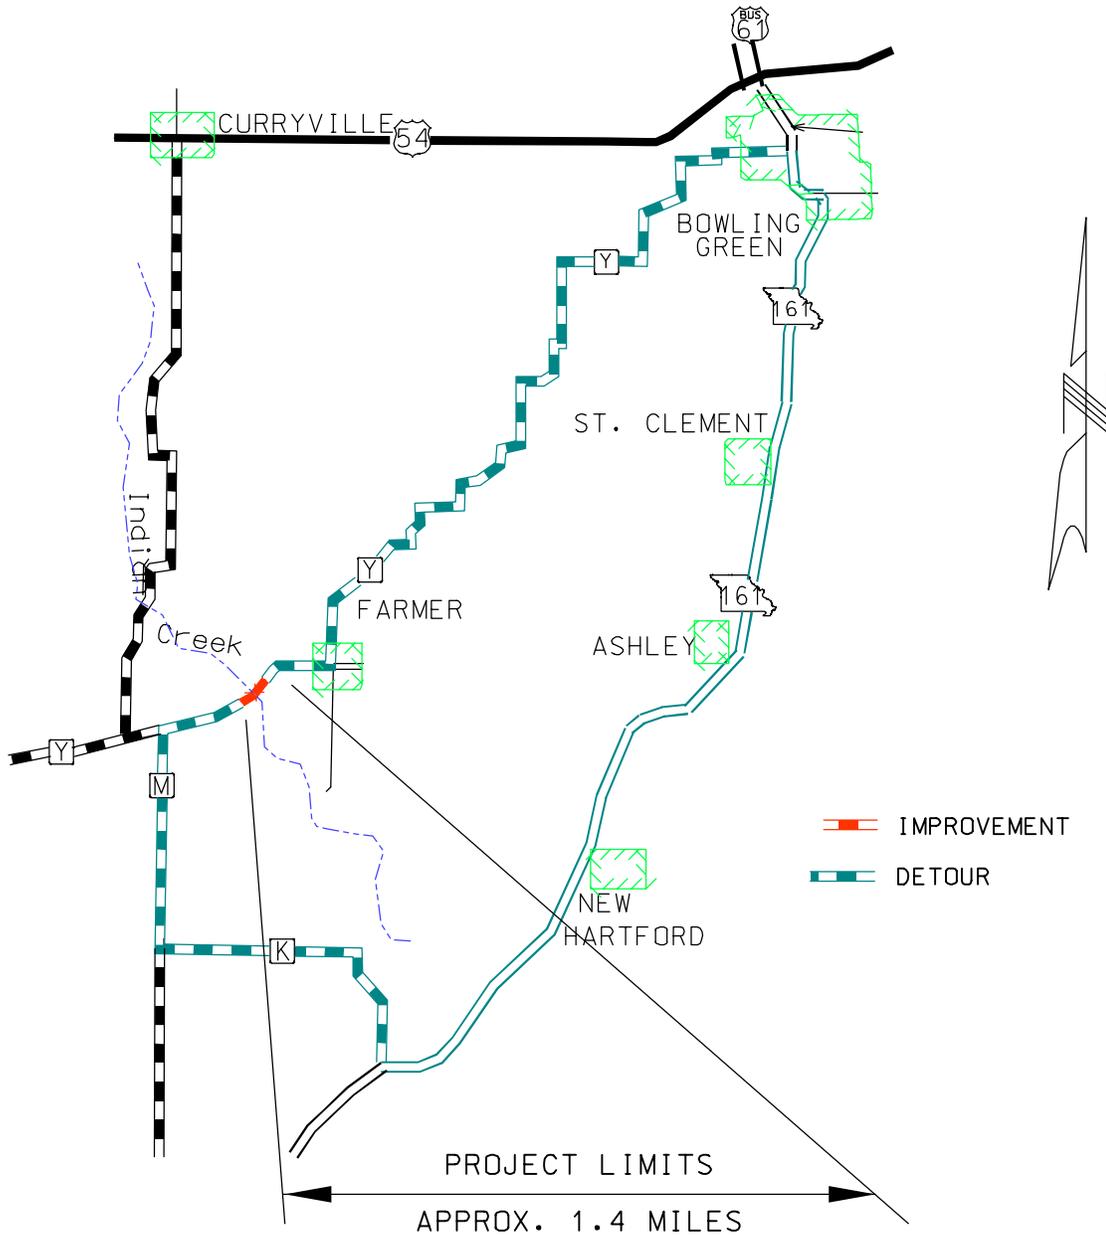

1. Submit exhibit to commissionexhibit@mail.modot.state.mo.us 30 days prior to the Commission meeting.
2. The location sketch should reflect the location map from the title page of the project plans.
3. Only Microstation files are to be submitted using the two-dimensional template seed files available on district file servers and the Consultant Services MoDOT web page. Exhibits submitted in any other format, or Microstation files with referenced material in other formats, require substantial revision prior to presentation to the Commission.
4. The exhibit should be white lines on a black (default) background. Road lines and styles are to be shown using the Title settings manager.
5. The following color scheme shall apply:
 - ? **RED** (Microstation Color No. 2) – Route changes and associated roadway and/or bridge changes.
 - ? **BLUE** (Microstation Color No. 9) – Detours.
 - ? **BLUE** (Microstation Color No. 3) – Waterways (labeled).
 - ? **GREEN** (Microstation Color No. 4) – City limits.
6. It is helpful to show direction to interstates, nearby cities/towns, etc. with arrows. Other information on the exhibit used for the public hearing, such as side streets, section lines and numbers, schools, churches, etc. should be placed on a different level and turned off for the Commission exhibit.
7. Edit the templates to add route number, county name, and project number.
