SiteWatch™

Remote. Control.

CASE SiteWatch™ telematics breaks the boundaries of fleet management by allowing you to monitor and manage multiple machines and jobsites from your office, wherever that may be. No more manually tracking down engine hours and fuel levels. Get vital machine performance, location and utilization data remotely sent to you in real time, all the time, to keep crews accountable and projects running efficiently.

INCREASED PRODUCTIVITY

Idle time burns, working time earns. SiteWatch provides real-time analytics to make it easy for you to track, measure and manage engine idle time, fuel levels and machine performance throughout the workday. It allows you to address inefficiencies and cut down on operating costs.

ACCURATE JOB COSTING

Accurate tracking of machine usage and performance is key to reliable forecasting and bids. SiteWatch makes it simple to get a detailed picture of your fleet's capabilities and minimizes manual data entry so you can allocate your resources more effectively.

Analyze fuel use and performance

Get operation details from the machine

CUSTOMIZED DATA

SiteWatch monitors 12 parameters (8 customizable)– more than any other competitive solution.

DEPENDABLE SECURITY

Protect your fleet with features such as **machine curfew**, **geofencing** and **motion detection** – one of the only services that tracks machine movement even when the machine is turned off. Not only will SiteWatch send text or email messages whenever unauthorized usage or movement occurs, but if a machine does leave the premises, the system can aid in tracking and recovery as well.

Locate your machines and receive alerts

SIMPLIFIED MAINTENANCE

Stay a step ahead of machine maintenance. Track maintenance history, set automatic alerts and have reminders sent via text, email or both to you and your dealer. It gives your team time to prepare and you one less thing to remember.

FLEXIBLE REPORTING

Have up-to-the-minute spreadsheets at the ready and customize the information received to meet your needs. Plus, the SiteWatch application programming interface (API) enables you to aggregate data from several telematics systems into a single database for simple, **mixed-fleet data management**.

Compare how your machines are being used

PROACTIVE DEALER SUPPORT

With SiteWatch, your CASE dealer is also able to monitor your fleet and receive equipment alerts. This enables them to help diagnose issues remotely, minimize service response time, pinpoint part needs and give you some extra backup to oversee your operation.

EFFICIENT UTILIZATION

Get the most from your fleet and offset rental costs by identifying under- or over-used machines. Improve job assignment effectiveness and make informed adjustments of equipment or crew as needed.

Check machine utilization around the site

Run your operation from any location.

Experience the ultimate in remote fleet management with CASE SiteWatch. You get real-time performance metrics, idle-time analytics, scheduled maintenance intervals and programmable security alerts sent to any computer, anytime, anywhere.

SiteWatch is available in two convenient subscriptions – Basic and Advanced.

Talk to your CASE dealer to see which subscription is right for your business needs.

PLAN FEATURES		BASIC	ADVANCED
 Fleet Management	Locating and pinging machines for project management	✓	✓
	Machine hour reporting	✓	✓
 Planned Maintenance	Plan and prepare for maintenance intervals (ordering parts, scheduling)	✓	✓
 Security	Geofencing: Real-time notification of unplanned movements	✓	✓
	Curfew	✓	✓
 Utilization Analysis & Reporting	Reporting: Machine run times, idle time vs. operation, travel time, machine utilization by location	✓	✓
 Performance Analysis	Engine load data to compare machines and operators to identify operation trends		✓
 Fuel Info & Reporting	Fuel rate and consumption data to track fuel use for one machine or a fleet		✓
 Machine Health Parameters	Track machine operating characteristics: Temperatures, pressures, alerts for out-of-range parameters and CAN-bus parameters for diagnostics and troubleshooting		✓
