

# What are “ Environmental Constraints ?”

---

Environmental Constraints are resources within the human and natural environments that we’d want to avoid or minimize impact to, such as:

- **Streams**
- **Wetlands**
- **Floodplains**
- **Cemeteries**
- **Historic Buildings**
- **Waste Sites**
- **Endangered Species**
- **New Development**
- **Parks**
- **Churches**
- **Schools**
- **Hospitals**
- **Archeological Sites**
- **Caves and Sink Holes**

Do you know of any constraints on Route 63 in the study area? If so, please share your comments with a MoDOT representative.
