

MoDOT Minute – Dec. 28, 2010

Hi. This is Sally Oxenhandler with your MoDOT Minute.

Looking back on 2010, MoDOT Director Kevin Keith says the agency made strong progress in improving the state's highway system. Those improvements contribute to the state's continuing drop in highway deaths, which leads Keith's top 10 signs of progress. Other accomplishments include completing the major kcICON project in Kansas City six months early and opening a new or improved bridge every two and a half days. For the complete list, visit www.modot.org.

Missourians have a chance to offer suggestions about the state's rail future through an online survey located at www.modot.org. The survey results will be used to develop a comprehensive rail plan focusing on freight rail development, passenger rail and rail crossing safety.

Want a tip on how to keep snowplows from depositing snow in your driveway once you've cleared it? A new video located at www.youtube.com/modotvideo provides the secret.

That's been your MoDOT Minute. Remember to check back every week for new information.
