

Hi, this is Sally Oxenhandler with your MoDOT Minute.

MoDOT is fixing a bridge every day and a half under its Safe & Sound Bridge Improvement Program. Thirty-four bridges are currently under construction, 51 are finished and 717 remain to be completed. The average time a bridge has been closed is 40 days and the projects have been completed an average of three days ahead of schedule.

MoDOT will use an \$800,000 federal grant to install six electronic message boards and 12 closed circuit television cameras on state highways in south central and southeast Missouri. The new equipment will inform motorists about road closings, accidents and hazardous road conditions.

A free publication that provides airport and navigation data is now available. You can get one at most local airports or by calling toll-free 1-888-ASK-MODOT.

That's been your MoDOT Minute. Remember to check back every Tuesday for new information.
