

Linn County Bridge Replacement Projects

Route B – Locust Creek Bridge
Route WW – Clark Branch Bridge

Welcome!

The Missouri Department of Transportation hosted an open-house style public meeting on Tuesday, Aug. 6, 2013, at the Marceline High School auditorium to discuss two bridge replacement projects planned for Linn County: the Locust Creek Bridge on Route B near Linneus and the Clark Branch Bridge on Route WW near Marceline.

For those who were not able to make the meeting, or for those who were able to make it but would like another look at the display materials we had on-hand at the meeting, we've uploaded all the display materials to this webpage.

After you've had a chance to look at the displays and materials, please share your questions and comments with us. MoDOT employees are here to assist you and explain aspects of the planned project. Your input is very important to us.

For more information, use the online comment form on the webpage or call us toll-free at 888-ASK-MODOT (888-275-6636).

Thank you for taking the time to learn more about the project and share your views with us.
