What's the problem?

The Route 39 bridge over Table Rock Lake was built in 1958. The deck needs full replacement and the stucture needs painting.

What impact will that have on travel?

During construction one lane of traffic will be open throughout the project. MoDOT will use a temporary signal to control traffic crossing the 1,440 foot structure.

What's the timeframe?

Work is expected to get underway after Labor Day 2012. The project will be finished by Memorial Day 2013. Painting may extend beyond this timetable, which would affect a lane of traffic at a time.
